SpendWise – Personal Finance Tracker *(In progress)*

JavaScript | Firebase Authentication | Firestore | HTML | CSS

A web-based personal finance application designed to help users track income, expenses, and budgets through a structured dashboard system.

- Developed a full authentication system using Firebase Authentication (user login and registration).
- Built a dynamic dashboard for tracking income, expenses, savings, and monthly balances.
- Implemented transaction management with add, edit, delete, and category filtering functionality.
- Designed a budgeting system with per-category limits and spending analysis per month.
- Integrated Firebase Firestore to replace local storage with cloud-based data persistence.
- Actively improving backend structure and migrating towards a scalable Firebase architecture.
